Company Profile

We, **Jagdamba Enterprise**, are pleased to introduce ourselves as a reliable and professional organization engaged in Structure Design, Structure Fabrication, Structure Steel Erection, and Manpower Supply for Mechanical Works.

Established with a vision to deliver quality engineering services, **Jagdamba Enterprise** provides complete mechanical and structural solutions for industrial, construction, engineering, and project-based requirements. We are committed to delivering accurate workmanship, timely execution, and dependable service support as per client specifications.

Our team has valuable experience in handling fabrication and erection work for different types of industrial projects. With skilled manpower, proper planning, and strong technical knowledge, we ensure that every project is completed safely, efficiently, and with high-quality standards.

We believe in building long-term relationships with our clients through honest work, professional service, and consistent performance. Our focus is always on providing practical, cost-effective, and durable solutions for every project.

Our Major Activities Include

Structure Design: We provide structural design solutions as per project requirements, focusing on strength, safety, durability, and practical execution.

Steel Structure Fabrication: We undertake fabrication work for various steel structures and mechanical structural components, including Power House Structures, GCP Bag House Structures, Cast House Structures, Dedusting Structures, Stove Housing Structures, RGST Structures, Cyclone Structures, Gantry Crane Girders, Pump House Structures, Pipeline Bridges, and other customized industrial structural works.

Steel Structure Erection: We undertake complete steel structure erection works with proper alignment, safety practices, and timely execution. Our services include erection of super structures, power house structures, gantry cranes, water stop log gates, trash rack cleaning machines, roof trusses, roof sheet installation, piping erection, fit-up, welding and testing, hoppers, canopies in cast house dedusting systems, duct and venturi erection in stove housing and GCP bag house including inlet and outlet ducts, as well as oxygen plant structures.

Equipment Erection: We undertake professional equipment erection work for various industrial projects, ensuring proper alignment, safe installation, and reliable execution. Our services include the erection of Vertex Breakers, Goggle Valves, Vessels, Lock Hoppers, Venturi Systems in GCP Bag Houses, Vessel Erection, and Pipe Racks in Sulfur Recovery Units (SRU). We focus on quality workmanship, safety standards, and timely project completion to meet the requirements of steel plants, refineries, and other industrial sectors.

Manpower Supply: We supply skilled and experienced manpower for mechanical work, fabrication work, erection work, site work, and industrial project support.
